

Illustration showing several hands of different colors (red, orange, yellow, purple, blue, green) holding and supporting a central DNA double helix structure. The hands are positioned around the DNA, suggesting collaboration and support in research.

## COME AND KEEP YOUR SKILLS IN TUNE

### INSERM IS RECRUITING: 60 TENURE POSITIONS ARE OFFERED TO RESEARCHERS M/F DEDICATED TO BIOMEDICAL RESEARCH

Candidates to Research Associates must have a PhD (or equivalent degree). There is no nationality restriction.

**Inserm is the only French public research institute to focus entirely on human health.**

The Institute brings together 15,000 researchers, engineers, technicians, and administrative staff around one common goal: to improve the health of all by advancing knowledge of life and disease, innovation in treatment, and public health research.

Through its diversity of approaches, Inserm provides a unique environment for researchers.

In order to lead its research policy as effectively as possible, Inserm owns over 350 research structures spread across France and abroad.

**Application modalities : visit our website : <https://eva3-accueil.inserm.fr>  
Application deadline : January 10th, 2019 - 5.00.pm (GMT+1)**
