Global Health Conference

Berlin, June 28th, 2019

10:00 - 15:30h

Chances and Implications of Digitalization in Healthcare in Germany and France

In partnership with the scientific service
of the Embassy of France in Berlin

“The advancement of digitization is the central prerequisite for the successful development of our healthcare system”, according to the website of the German Ministry of Health.

How far did Germany and France get in 2019? How do we as patients, caregivers, scientists and entrepreneurs experience the upheaval and the possibilities that digitalization and new technologies offer? How do roles and responsibilities for both patients and caregivers change and how do the stakeholders manage this transformation? And is everybody sufficiently aware of the ethical questions which come along when robots and algorithms replace human beings? And after all, will this improve healthcare for the individual?

With this year's conference, hosted by the Centre Virchow-Villermé for Public Health Paris-Berlin, we invite you to gain an insight into the developments of digitalization in different areas of the healthcare system in Germany and France and to discuss opportunities and implications of digitalization in healthcare on different levels.

Practical details Venue

Französische Botschaft
Wilhelmstr. 69, 10117 Berlin, Germany
Entrance: Wilhelmstr. 69

The Centre Virchow-Villermé for Public Health Paris-Berlin was initiated by the Franco-German Council of Ministers and co-established on 15 April 2013 by the University of Sorbonne Paris Cité and the Charité - Universitätsmedizin Berlin on the occasion of the 50th anniversary of the Elysée Treaty.

The mission of the French-German initiative is to jointly develop and promote innovative education and to offer a bi-national platform for linking research with policy in Global Public Health.

The objectives of the Centre are to foster faculty and students' mobility between France and Germany, to organize French-German dialogue in Global Public Health, to contribute to research activities in different areas of Global Public Health, to play a leading role in innovative education in Global Public Health and to promote open access to education and research.
