

The PEPR "Food Systems, Microbiomes and Health (SAMS)" is launching a call for four junior chairs.

Closing date extended to September 24th, 24

Call website: [click here](#)

Objective :

This call aims to give young scientists the opportunity to set up and lead a research team in a laboratory established in France.

The Chairs should have the ambition to develop research of excellence in the field of the microbiome in prevention and human health, and to enrich the environment and the national research infrastructures being built in this field.

Duration and funding :

Duration: 48 to 54 months

Aid allocated: maximum 500,000 euros (excluding management costs)

Procedure :

- **First phase:** selective and compulsory. Submission of an application whose objective is to demonstrate the interest in integrating the French research environment (identification of the host laboratory is not mandatory). **Submission deadline: September 24th, 2024, 11 a.m. CET ;**
- **Second phase:** submission of a research project in collaboration with the chosen host laboratory. Estimated deadline for submission: February 2025.
